## About Us...

Turnbull & Son is a family run company, founded in 1980 and offering expert tree surgery, hedge cutting and stump grinding services throughout Nottinghamshire and surrounding counties.

We offer a full range of commercial and domestic tree services, which include tree removal, pruning, stump grinding, and hedge cutting.

All of our staff are fully qualified to the highest level, bringing years of experience to deliver the highest, professional standard.

## Free No Obligation Quote

We offer expert guidance and advice considering all aspects of the work, providing a free, professionally presented, no obligation quote following an onsite visit.

We will happily take care of any planning applications and deal directly with the relevant authorities on your behalf.

## Where we work...

Turnbull & Son is based in Southwell, and provides professional arboricultural services across Nottinghamshire, Lincolnshire & Derbyshire.

**TURNBULL & SON**  
PROFESSIONAL TREE AND HEDGE CARE

## How we work...

Customer care and satisfaction are our top priority, we pride ourselves on our outstanding reputation and references to match.

We work in accordance with the BS3998 standard, and constantly update our skills and knowledge with the latest industry best practices.

## Our Staff

All of our staff are fully trained to the highest level and hold City & Guilds NPTC Qualifications.

We also each hold specialist industry specific First Aid qualifications.

## Licensed Waste Carrier

Turnbull and Son is a registered waste carrier, allowing us to legally and safely dispose of waste, most of which becomes sustainable bio-fuel.

## NRSA Accredited

We also hold a New Roads & Street Works Act accreditation, ensuring the road side services we offer are delivered appropriately to keep all highway users safe.

# Tree Removal

Ranging from small domestic tree removal to commercial felling, our team utilise the latest techniques to remove trees safely...

Reasons for removal could include:

- Declining health of the tree
- Potential risk to people or property
- Ensuring the health of surrounding flora

We try to avoid complete removal where possible, using our expertise to advise where trees can be saved and only removing as a last resort.

Once removed, we also provide Stump Grinding Services to take the remaining tree stump below ground level.

## Protected Trees

We will always check the protection status of all trees we work on.

If a tree has a Protection Order or falls within a conservation area, we are more than happy to take on the planning application process on your behalf.

# Stump Grinding

We use the the latest in Stump Grinding machinery and techniques to remove unwanted tree stumps.

Stumps may need removing after a tree has died, to prevent parasites & fungus spreading, or to prevent future regrowth.

## How Does it Work?

The process involves grinding the stump in to chippings which are left on site and provide an excellent planting medium for future garden projects.

## Fast, Free Quote via Email

If you only require our stump grinding services, we can provide a quote for removal of your stump via email.

All we need is a clear photograph of the stump with a ruler or tape measure for scale.

## Our Sister Company

We work in partnership for stump grinding projects with our sister company, Nottingham Stump Grinding.

Contact us for more information, & send your stump photos to: [info@nottinghamstumpgrinding.co.uk](mailto:info@nottinghamstumpgrinding.co.uk)

# Malus Tree & Stump Removal, Southwell

This dying Malus tree needed removing.  
After removing the tree we cut the  
remaining stem as low as possible.

Our machine reduces the remaining stump  
to chippings, which are left on site.

This fills the hole and provides an  
ideal planting medium for the next  
stage of landscaping.

## Crown Reduction

Reduction of the overall size and shape of the tree

## Crown Thinning

Reduction of branch volume, reducing crown density to increase sunlight.

## Crown Lifting

Removal of lower branches to raise the canopy

## Formative Pruning

The pruning of young trees to encourage good form and structure

## Dead Wooding

Removal of dead branches from the canopy

## Pollarding

The process of heavily reducing a tree to encourage manageable regrowth

## Limb Removal

Removal of dangerous, overhanging and encroaching limbs

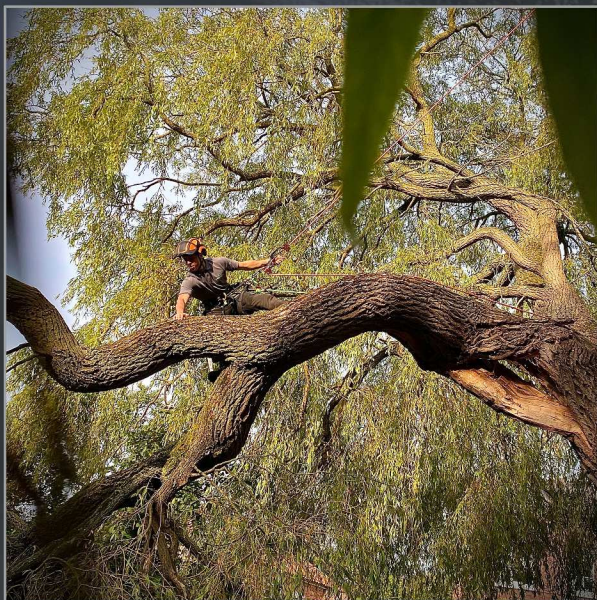

## Garden Maintenance

Private and commercial arboricultural maintenance

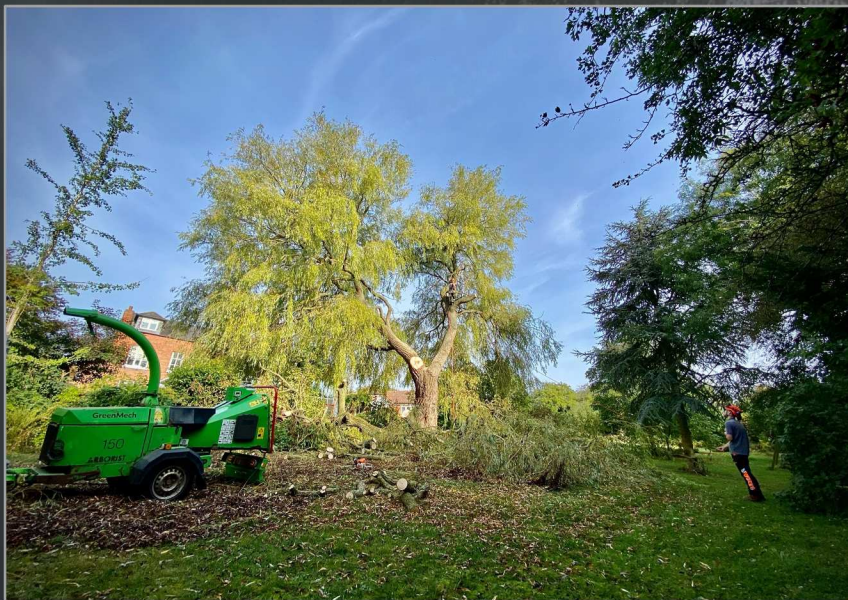

## Overgrown Willow with a Snapped Limb, Brinkley

This willow had become so large the limb could no longer support the weight of its growth...

We recommended pollarding - the process of removing all growth back to the main stems to encourage re-growth.

This is the best way to keep a healthy, mature tree that might be a bit too big at a manageable size.

## Hedge Cutting

We have extensive experience in large scale commercial hedge cutting, including;

- Trimming
- Shaping
- Lowering
- Removal

## Forestry

We offer a full range of forestry services, from large scale felling to thinning

## Processing

Generally combined with our other services such as Tree Removal and Forestry, we can process your timber into firewood or mill it into slabs.

## Clearance

Whatever your need; for building, commercial developments or grounds management, we can clear your site of all trees and shrubbery.

## Health & Safety

We employ an expert health and safety officer to ensure our policies and procedures not only adhere to HSE & industry guidelines, but provide a safe working framework for our staff.

Our policies outline safe standard operating procedures for all aspects of our work, from working at height to environmental safety.

We operate an established Health and Safety Management System which keeps us at the forefront of safe, efficient and adaptable working.

## Training

All of our staff are fully trained to the highest level and hold City & Guilds NPTC Qualifications.

We also each hold specialist industry specific First Aid qualifications.

## Risk Assessment

We conduct a site inspection and written risk assessment prior to all work, and maintain a dynamic risk assessment whilst on-site so that all eventualities can be dealt with immediately.

## Our Full Policies

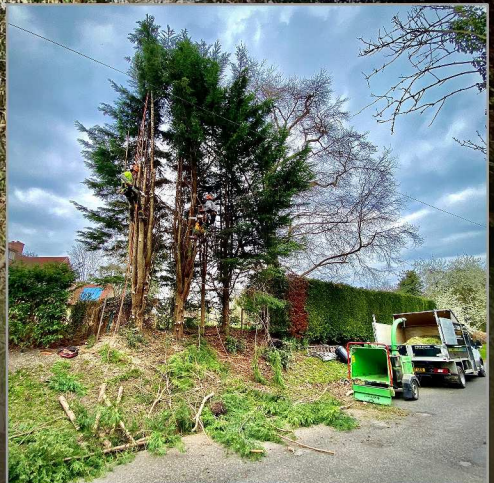

Full copies of our policies can be found online, at: [turnbullandson.com](http://turnbullandson.com).

For more information about our Health & Safety, Standard Operating Procedures & Risk Assessments, please email Alex, at: [enquiries@turnbullandson.com](mailto:enquiries@turnbullandson.com)

# Trio of Overgrown Conifers, Southwell

We were asked by a new client to remove three large pines to make way for new hedging...

We're pleased to say the new Yew hedging looks beautiful, and we've been asked back to continue further works.
